## Hilfsmittel und Informationen zur Datenbank "Erik Amburger"

### Nr. 1: Verzeichnis der vollständig in die Datenbank aufgenommenen Personen

---

#### Vorwort

Die Kartei von Erik Amburger zu Ausländern im vorrevolutionären Rußland wird derzeit am Osteuropa-Institut München in eine Datenbank aufgenommen. Diese Arbeit wird in etwa zwei Jahren abgeschlossen sein. Dann sollen alle Daten auch online über das World Wide Webnet abfragbar sein. Um Wissenschaftlern und Familienforschern schon jetzt ein dringend gewünschtes Hilfsmittel an die Hand zu geben, haben wir uns entschlossen, in unregelmäßigen Abständen gedruckte Verzeichnisse über die Personen herauszugeben, die in Erik Amburgers Kartei erfaßt sind. Dieser Band ist der erste in dieser Reihe. Er führt die etwa 15.000 Personen auf, die bereits vollständig in die Datenbank aufgenommen worden sind. Da bei den sehr begrenzten Kräften des Osteuropa-Instituts München die Priorität auf den weiteren Aufbau der Datenbank gelegt werden muß, habe ich bei diesem Verzeichnis bewußt darauf verzichtet, gewisse technische Grenzen des Datenbanksystems durch Nachbearbeitung von Hand auszugleichen. Ich bin mir auch bewußt, daß manche Personen doppelt aufgenommen wurden, daß trotz mehrerer Korrekturläufe Tippfehler stehengeblieben sind usw.

Aktuelle Informationen zur Datenbank werden regelmäßig in den WEB-Seiten der Historischen Abteilung des Osteuropa-Instituts München bekannt gemacht:

<http://lrz-muenchen.de/~oeim/oei-hist.htm>

Folgende Konventionen liegen diesem Verzeichnis zugrunde:

- Personen sind mehrfach aufgeführt, wenn bei einer der ausgeworfenen Informationen Mehrfacheinträge vorliegen (Familiennamen, Vornamen, Rufnamen, russische Vornamen, Geburts- und Sterbedatum).
- Rufnamen sind gesondert aufgeführt (in Anführungszeichen nach einem "=").
- Die in russischer Umgebung gebrauchten Namensformen stehen in Klammern.
- Kalenderdaten sind in invertierter Reihenfolge (Jahr-Monat-Tag) notiert. Unbekannte Datumselemente werden durch "00" ersetzt.
- Die Zahl nach dem Pfeil verweist auf die fortlaufende Datenbanknummer.
